Prompt Operations Hackathon · 24 to 25 Oct 2026

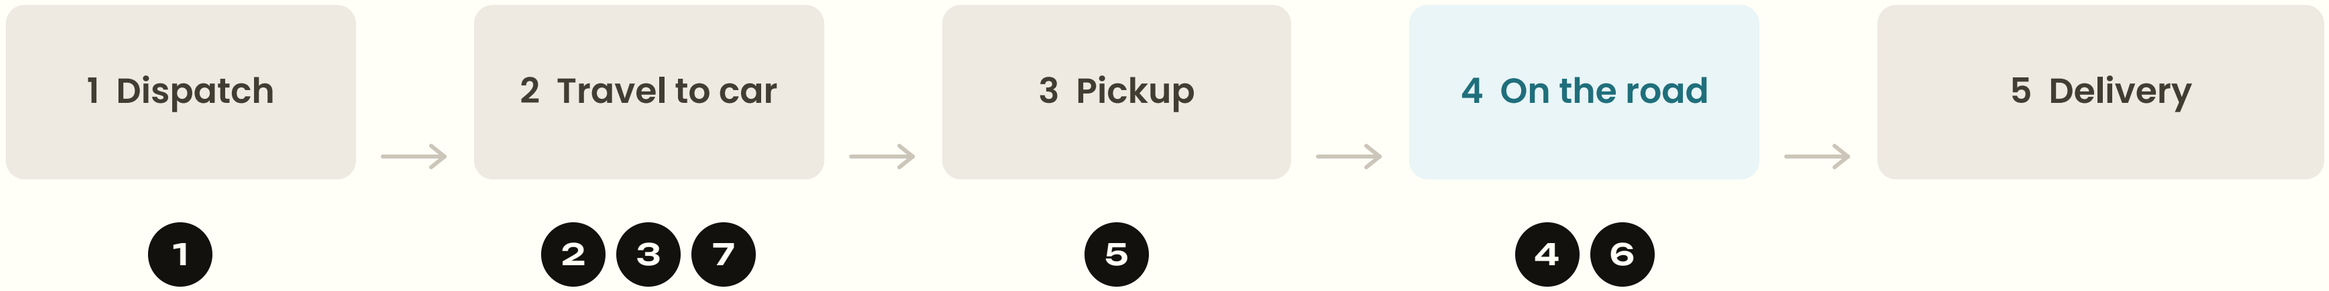

EIGHT WAYS TO GIVE YOUR AGENTS MORE LEGWORK

Help us pick the one to build

Veikka Silvekoski

Where they fit

EIGHT IDEAS ACROSS ONE DELIVERY

LEARNING LAYER, UNDER EVERY AGENT 8

1. Carpooling
2. Strike watch
3. Scooters
4. GPS stop check
5. Check-in
6. Data stick
7. Voice desk
8. Judge every run

1 Dispatch Own proposal

DRIVER CARPOOLING

Shared rides make domestic gigs cheaper to sell.

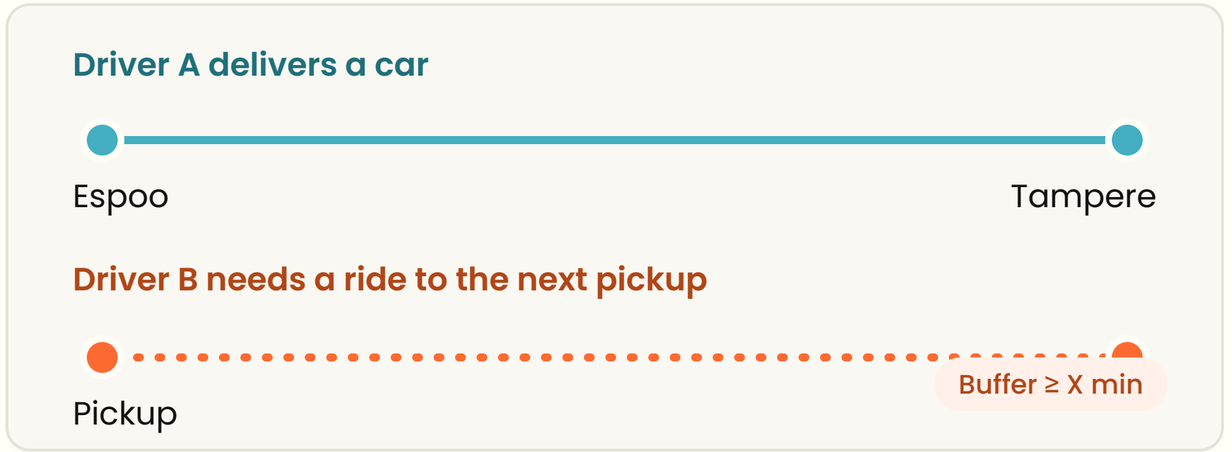

TODAY

Drivers already arrange rides in a Telegram group. Bahn does not run this. Each driver travels to the car alone.

> *"Drivers already arrange rides in a Telegram group. Bahn has not facilitated it, but said it could be a lever."*
>
> T3

THE HUMAN MOMENT

Both drivers accept the match in the app. No ops person is needed unless the buffer breaks.

Fee before

50 EUR

→

Fee after

Lower

Brief fit	Bahn's pain	Control room	Demo w/ packet	New idea	Low risk
●●○	●●○	●●○	●●○	●●●	●●○

2 Driver travel

RAIL STRIKE WATCH

Find out about the strike before the train fails.

TODAY

A strike on a train leg breaks the driver's trip to the car. Someone finds out late and re-plans by hand.

> *"Strikes in Central Europe were named as useful to monitor. Deutsche Bahn was called "the final boss"."*
>
> T2

THE HUMAN MOMENT

A person approves only if the new plan costs more than a limit or moves the pickup date.

Brief fit	Bahn's pain	Control room	Demo w/ packet	New idea	Low risk
●●●	●●○	●●●	●●●	●●○	●●●

3 Driver travel

SCOOTERS FOR THE LAST KILOMETER

Correct arrival times where Google Routes guesses wrong.

TODAY

The last leg is planned with Google Routes. Scooters are not in the system, so times for short hops are off.

> *“Scooters are not in the system yet. Bahn said it "would be sick". The last leg uses Google Routes today.”*
>
> T2

THE HUMAN MOMENT

None in the normal case. The driver chooses. We say this plainly.

3.5 km

Station ..... **Pickup**

Bus	Taxi	Scooter *
38 min	**9 min**	**14 min**
4 EUR	22 EUR	6 EUR

THE AGENT CHECKS

Free scooter · Inside zone · Legal end spot

Brief fit	Bahn's pain	Control room	Demo w/ packet	New idea	Low risk
●●○	●○○	●○○	●●○	●●○	●●●

4 On the road

GPS STOP CHECK

Every long stop gets checked. People see only the real ones.

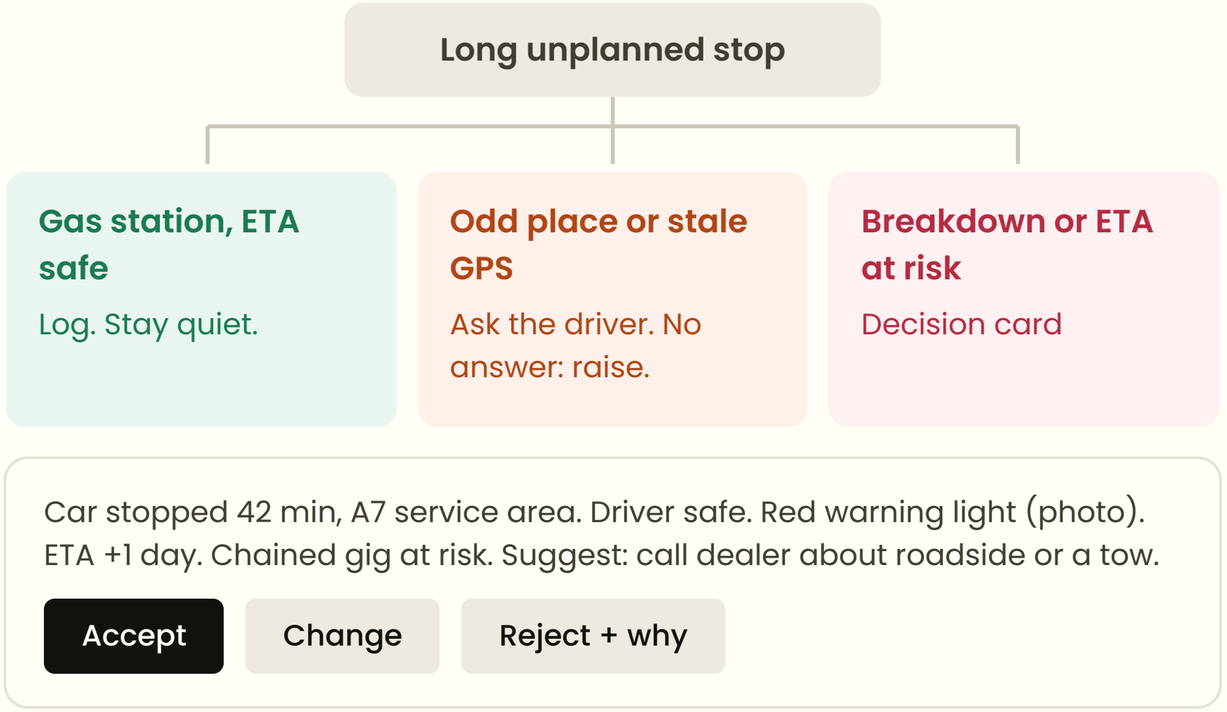

TODAY

Long stops on the road are hard to judge. Most are harmless. A few are a breakdown that puts the delivery at risk.

> *“Bahn does not use agents for monitoring yet. A places lookup on long stops would be interesting for this challenge.”*
>
> T3

THE HUMAN MOMENT

Breakdown or delivery at risk: one decision card. A customer message goes out only after approval.

Brief fit	Bahn's pain	Control room	Demo w/ packet	New idea	Low risk
●●●	●●●	●●●	●●●	●●○	●●●

5 On the road Live monitoring

CHECK-IN BEFORE GPS STARTS

Know a driver is moving hours before tracking is allowed.

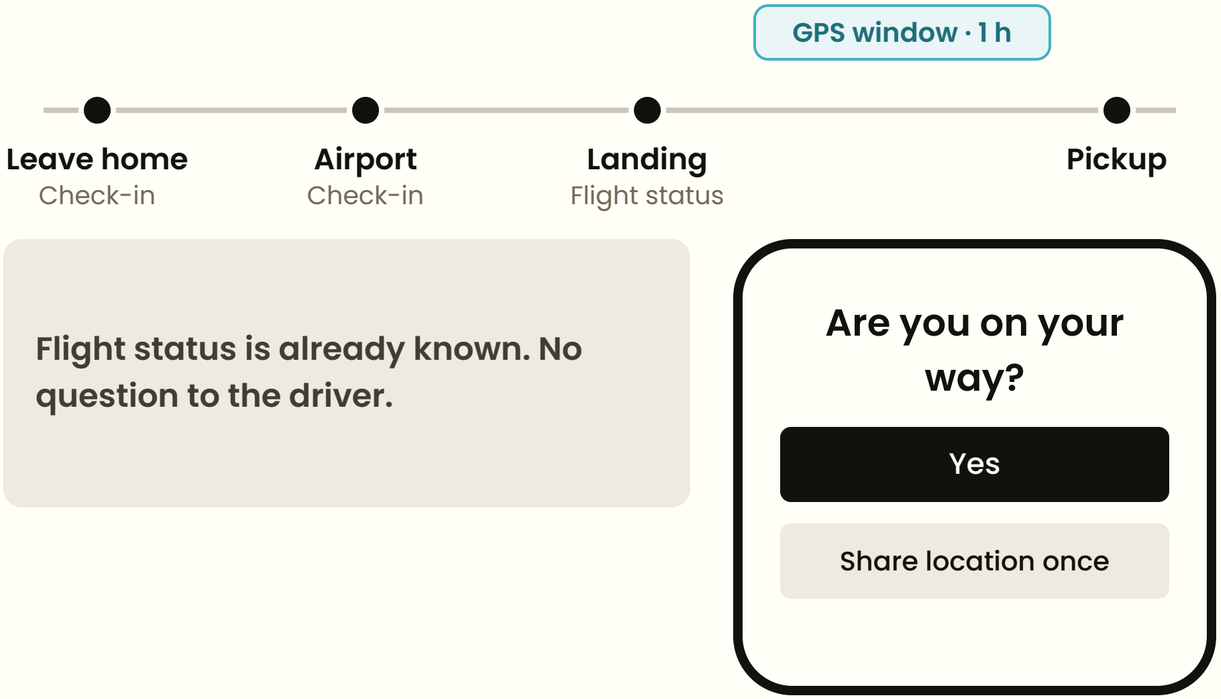

TODAY

GPS starts about one hour before pickup. For far pickups that is too late to see a problem.

> *“GPS turns on about an hour before pickup because drivers dislike earlier tracking. Bahn suggested in-app notifications.”*
>
> T3

THE HUMAN MOMENT

No answer after the reminder: repost the gig, or ask the pickup place to move the slot.

Brief fit	Bahn's pain	Control room	Demo w/ packet	New idea	Low risk
●●●	●●○	●●●	●●●	●●●	●●●

6 On the road Own proposal Needs hardware

PLUG-IN CAR DATA STICK

The decision card shows the exact fault, not a blurry photo.

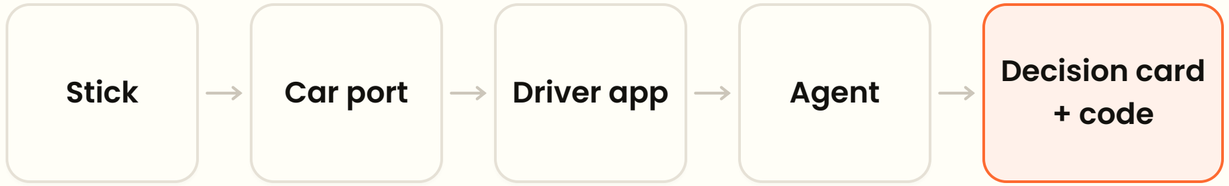

TODAY

A driver sends a photo of a warning light. The ops person guesses the fault and its severity.

> *“Manufacturer APIs cost around 100 EUR per car. Bahn was unsure about a stick, but said it would be great if it works.”*
>
> T2

THE HUMAN MOMENT

The same decision card as idea 4, now with a fault code and a severity.

THE STICK READS

Fault code · Fuel or battery · Mileage · Speed

OPEN QUESTION

May a driver plug a device into a customer car?

Brief fit	Bahn's pain	Control room	Demo w/ packet	New idea	Low risk
●●○	●●○	●●○	●○○	●●●	●○○

7 Driver travel

VOICE AGENT FOR FERRY AND AIRLINE DESKS

The agent makes the boring phone call and brings back options.

TODAY

Someone calls a ferry or airline desk to ask for space, a new slot or a name change.

> *“Voice agents already call pickup places, not travel desks. Bahn said this is usually a small need, since most changes work online.”*
>
> T3

THE HUMAN MOMENT

A person picks one of the collected options. The agent then calls back to confirm.

Agent Is there space for one car on tonight's ship?

Desk Tonight is full. 07:30 tomorrow has space.

Agent What does a name change cost?

Desk 35 EUR.

OPTIONS FOR A PERSON TO PICK

07:30 tomorrow

+35 EUR, hotel needed?

19:00 tomorrow

+35 EUR, no hotel

Brief fit	Bahn's pain	Control room	Demo w/ packet	New idea	Low risk
●●○	●○○	●●○	●●○	●○○	●●○

8 Learning layer Sits under any agent

JUDGE EVERY RUN WITH JEV

Every rejection and odd run becomes the next eval, automatically.

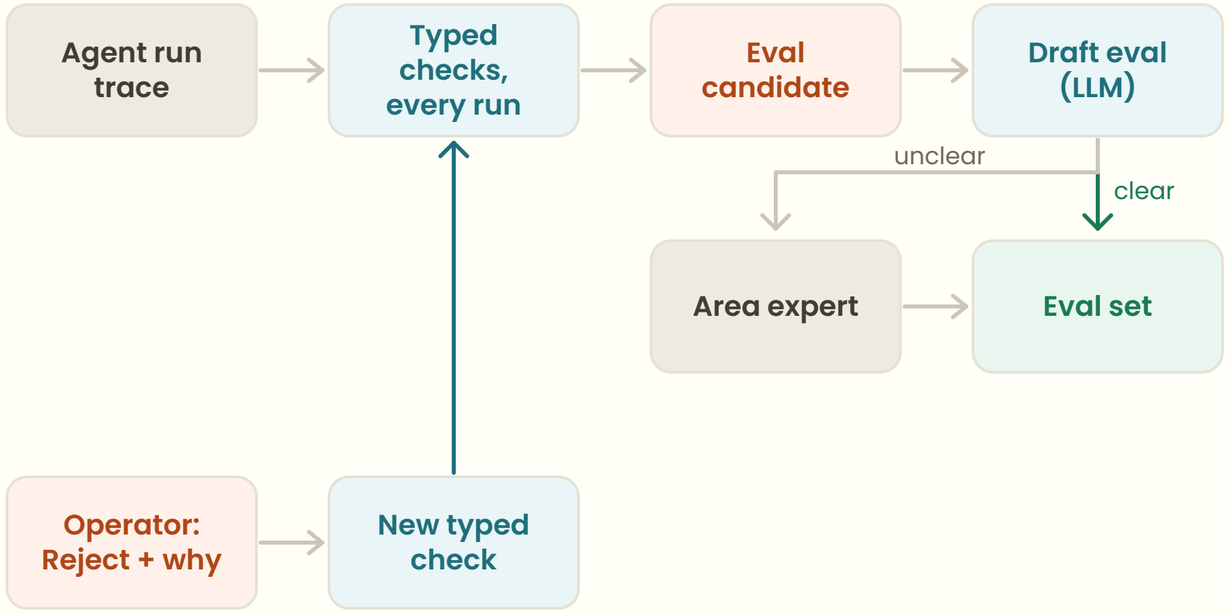

TODAY

Knowledge sits in people's heads. New eval cases come from hand-labeling, which does not scale.

> *"Bahn's biggest stated eval pain: get knowledge out of people's heads and find new eval cases at scale, with no hand-labeling."*
>
> T2

THE HUMAN MOMENT

The operator's "Reject + why" on any decision card. Area experts see only unclear drafts.

The new check feeds back into "Typed checks, every run".

Brief fit	Bahn's pain	Control room	Demo w/ packet	New idea	Low risk
